

Light Pole Instructions - Same Height as Wall

- PARTS LIST:
- (1) Standard male No-color Pole – 61"
 - (1) Red-coded female Pole – 54 1/4"
 - (1) Standard Tee Joint (1) Long Tee Joint

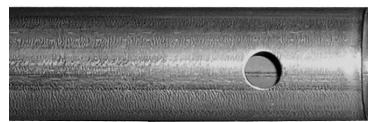

Standard Tee

Long Tee

ASSEMBLY:

The light pole is made of a standard male No-color pole and a shorter than standard female pole – colored red at the snap-button end.

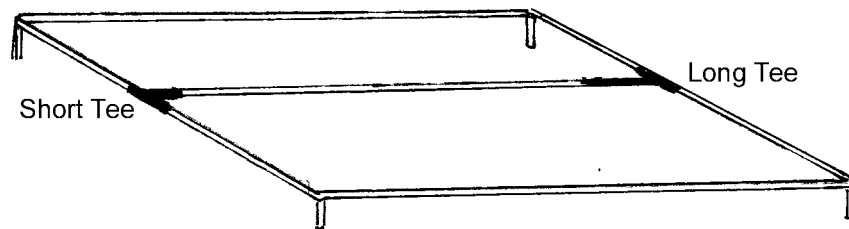

Female

Male

1. While assembling the roof frame (for a canopy) or the upper horizontal poles (for an indoor booth), slide the Tee joints – one short-stemmed and one long-stemmed – onto the upper horizontal poles opposite each other.

2. After canopy or indoor booth frame is completely assembled, insert the red-coded end of the assembled (male and female) light pole as far as possible into the long Tee Joint.
3. Slide the pole the other direction into the opposite short Tee Joint until it clicks into place.
4. Clamp or track lighting may then be attached to the light pole.
