

Light Pole Instructions - Same Height as Wall

- PARTS LIST: (1) Standard male Pole – 61"
(1) Red-coded female Pole – 54 1/4"
(1) Ell Joint (white arrow)
(1) Long Ell Joint

Ell Joint

Long Ell Joint

ASSEMBLY:

The light pole is made of a standard male No-color pole and a shorter than standard female pole – colored red at one end.

1. While assembling the roof frame (for a canopy) or the upper horizontal poles (for an indoor booth), slide the Ell joints – one short-stemmed and one long-stemmed – onto the upper horizontal poles opposite each other.

2. After canopy or indoor booth frame is completely assembled, insert the red-coded end of the assembled (male and female) light pole as far as possible into the long Ell Joint.
3. Slide the pole the other direction into the opposite short Ell Joint until it clicks into place.
4. Clamp or track lighting may then be attached to the light pole.
